

UNIT 5 — SPEAKING

Healthy Habits

English only • Maximum target: about 4.5 minutes

Bany:

Hey, Mumtaz. Today, let's talk about healthy habits. I think this is important for students like us. We have many classes and assignments, and sometimes we sleep late. Why do you think a healthy lifestyle is important?

Mumtaz:

I think it is important because it helps us stay healthy and have more energy. It is also good for our mental health. If we are too tired or stressed, it can be hard to study and focus, especially when we have many assignments.

Bany:

That's true. We should eat healthy food, drink enough water, and exercise regularly. We should also get enough sleep. Sometimes we have a lot of assignments, but we still need to manage our time so we can get enough rest.

Mumtaz:

We don't have to do difficult exercise every day. We can start with simple things. For example, we can walk around campus, use the stairs, or exercise with our friends. These activities can help us stay active.

Bany:

The university can also help students live healthier. For example, students can use the sports facilities on campus when they have free time. We ought to spend less time sitting and do more physical activities. Friends can also encourage each other to exercise.

Mumtaz:

Having friends around us can make healthy habits easier. We can walk together after class or play a sport together. We can also remind each other to drink enough water or get enough sleep. We don't have to do everything alone.

Bany:

Besides physical health, we also need to take care of our mental health. When we feel stressed, we can take a short break, listen to music, exercise, or talk to our friends. We shouldn't keep our problems to ourselves. Talking to someone we trust can help us feel better.

Mumtaz:

We should also know when we need to rest. Sometimes we keep studying because we want to finish everything quickly, but our mind can become tired. We need to take a short break and then continue studying. A short break can help us focus again.

Bany:

We must also manage our time well. If we manage our time, we can study, exercise, sleep, and still have time to relax. We can make a simple schedule and decide when to study, exercise, and rest.

UNIT 5 — SPEAKING: Healthy Habits

Mumtaz:

We should also pay attention to what we eat and drink. We don't have to stop eating our favorite food completely, but we should not eat too much unhealthy food. We can choose healthier food more often and drink more water instead of too many sugary drinks.

Bany:

I think balance is important. We can still enjoy our favorite food, but we should know our limits. We also need to avoid unhealthy habits. We had better reduce them little by little instead of trying to change everything in one day.

Mumtaz:

Small changes can be easier to follow. For example, if we usually sleep at midnight, we can try to sleep a little earlier. If we rarely exercise, we can start by walking for a few minutes every day. We don't have to make big changes immediately.

Bany:

Students can also use their free time better. Instead of spending all our free time on our phones, we can walk, exercise, clean our room, or talk with friends. These activities can also help us feel better.

Mumtaz:

So, to live a healthier life, we should take care of both our body and mind. We should eat better, drink enough water, get enough sleep, exercise regularly, and manage our stress. We can start with small habits and keep doing them every day.

Bany:

I agree. We don't need to be perfect. We just need to try to take better care of ourselves. If we make healthy choices every day, our life as students can become better and more comfortable.

Mumtaz:

A healthy lifestyle doesn't have to be difficult. We just need to start with simple things and keep doing them. If we support each other, it can be easier to build good habits.

Bany:

I think that's a good conclusion. Let's try to take better care of ourselves from now on.

Mumtaz:

Sure. Let's start with small changes and keep going every day.
