

UNIT 5 — SPEAKING

Healthy Habits

Bany:

Hey, Mumtaz. Today, let's talk about healthy habits. I think this is important for students like us. We have many classes and assignments, and sometimes we sleep late. So, why do you think having a healthy lifestyle is important?

Mumtaz:

Yeah, I agree. I think a healthy lifestyle is important because it helps us stay healthy and have more energy. It is also good for our mental health. If we are too tired or stressed, it can be hard to study and focus.

Bany:

That's true. We should eat healthy food, drink enough water, and exercise regularly. We should also get enough sleep. Sometimes we have a lot of assignments, but we still need to manage our time so we can get enough rest.

Mumtaz:

Yeah. We don't have to do difficult exercise. We can start with simple things. For example, we can walk around campus, use the stairs, or exercise with our friends. I think these simple activities can help us stay active.

Bany:

I agree. The university can also help students live healthier. For example, students can use the sports facilities on campus when they have free time. We ought to spend less time sitting and do more physical activities.

Mumtaz:

Besides our physical health, we also need to take care of our mental health. When we feel stressed, we can take a short break, listen to music, exercise, or talk to our friends. We shouldn't keep our problems to ourselves.

Bany:

Yeah, I think that's important. We must also manage our time well. If we manage our time, we can study, exercise, sleep, and still have time to relax. We don't have to change everything at once. We can start with small habits.

Mumtaz:

Exactly. We should start with simple things, like eating better, drinking enough water, getting enough sleep, and exercising regularly. We had better reduce unhealthy habits little by little. I think small changes can make a big difference.

Bany:

Yeah, I agree. We don't need to be perfect. We just need to try to take better care of ourselves every day.
