

UNIT 5 — SPEAKING

Healthy Habits — Extended Practice Version

English only

Bany:

Hey, Mumtaz. Today, let's talk about healthy habits. I think this is important for students like us. We have many classes and assignments, and sometimes we sleep late because we have work to finish. So, why do you think having a healthy lifestyle is important?

Mumtaz:

Yeah, I agree. I think a healthy lifestyle is important because it helps us stay healthy and have more energy. It is also good for our mental health. If we are too tired or stressed, it can be hard to study and focus. Sometimes we may feel lazy or not in the mood to do anything, especially when we have many assignments.

Bany:

That's true. We should eat healthy food, drink enough water, and exercise regularly. We should also get enough sleep. Sometimes we have a lot of assignments, but we still need to manage our time so we can get enough rest. I think sleeping enough is sometimes difficult for students, but we should not make it a habit to sleep very late every day.

Mumtaz:

Yeah. We don't have to do difficult exercise or go to the gym every day. We can start with simple things. For example, we can walk around campus, use the stairs, or exercise with our friends. We can also spend some time outside instead of sitting in our room all day. I think these simple activities can help us stay active.

Bany:

I agree. The university can also help students live healthier. For example, students can use the sports facilities on campus when they have free time. We ought to spend less time sitting and do more physical activities. Friends can also encourage each other. If one friend wants to exercise, we can join them instead of just staying in our room.

Mumtaz:

That's a good idea. I think having friends around us can make healthy habits easier. For example, we can walk together after class or play a sport together. We can also remind each other to drink enough water or get enough sleep. We don't have to do everything alone.

Bany:

Besides our physical health, we also need to take care of our mental health. When we feel stressed, we can take a short break, listen to music, exercise, or talk to our friends. We shouldn't keep our problems to ourselves. Sometimes talking to someone we trust can make

us feel better and help us think more clearly.

Mumtaz:

Yeah, and we should also know when we need to rest. Sometimes we keep studying because we want to finish everything quickly, but our mind can become tired. We need to take a short break and then continue studying. A short break doesn't mean we are being lazy. It can help us focus again.

Bany:

Yeah, I think that's important. We must also manage our time well. If we manage our time, we can study, exercise, sleep, and still have time to relax. For example, we can make a simple schedule for the day. We can decide when to study, when to exercise, and when to rest.

Mumtaz:

I agree. We also should pay attention to what we eat and drink. We don't have to stop eating our favorite food completely, but we should not eat too much unhealthy food. We can choose healthier food more often and drink more water instead of drinking too many sugary drinks.

Bany:

That's true. I think balance is important. We can still enjoy our favorite food, but we should know our limits. We also need to avoid habits that can make us unhealthy. We had better reduce unhealthy habits little by little instead of trying to change everything in one day.

Mumtaz:

Exactly. Small changes can be easier to follow. For example, if we usually sleep at midnight, we can try to sleep a little earlier. If we rarely exercise, we can start by walking for a few minutes every day. We don't have to make big changes immediately.

Bany:

And I think students can also use their free time better. Instead of spending all our free time on our phones, we can do something useful, like walking, exercising, cleaning our room, or talking with friends. These activities can also help us feel better.

Mumtaz:

Yeah, that's right. So, to live a healthier life, we should take care of both our body and our mind. We should eat better, drink enough water, get enough sleep, exercise regularly, and manage our stress. We can start with small habits and try to keep doing them every day.

Bany:

Yeah, I agree. We don't need to be perfect. We just need to try to take better care of ourselves. If we make healthy choices every day, I think our life as students can become better and more comfortable.

Mumtaz:

Exactly. A healthy lifestyle doesn't have to be difficult. We just need to start with simple things and be consistent. If we support each other, it can be easier to build good habits.

Bany:

Well, I think that's a good conclusion. Let's try to take better care of ourselves from now on.

Mumtaz:

Agreed. Let's start with small changes and keep going every day.
